In all Ages there have appear'd People fond of being though capable of discovering future Events, of which Foible the Devil taking Advantage, use many Artifices to indulge their diabolical and superstitious Suggestions, and bring them off from the Word of God.

☾ rises 3 21 M.

In former Days, Augurie, Aruspicie, Necromancie and Oneiromancie, were the Instruments the Devil made use of to deceive the World and catch unwary superstitious People.

Observe, that in this Text, the Woman is said to have a Spirit of Divination; and it was in her, for it possessed her, and that Spirit gave Answers thence or by her, for she brought her Master Profit by Sooth-saying. In V. 18. The Spirit is commanded out of her; hence it is plain, that from within her, that diabolical Spirit gave his Answers.

THE brightest of the Seven Stars is of the Third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the *Moon* and *Mercury*.

2. The fix'd Stars all rise, south, and set about four Minutes sooner every Night, than they did the Night before. This consider'd, the exact Time of their rising, southing, and setting, for any intermediate Night, not herein noted, may be very easily deduced from this Table, by Inspection only.

To know the Time of the rising, southing, and setting of any Star in this Table, for any Day requir'd, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the Seven Stars, on that Day, and you will have your Desire; observing, that in this Table *a* stands for *after*, and *b* for *before*.

2. cap. 8. those that first understood the Obliquity of
the Zodiack, *Rerum fors aperuisse*: For besides that, the find-
ing out hereof prepared the Way first to find out the periodical
Motion of the Planets. The Philosopher himself teacheth us,
that the Variety, Generation and Corruption of all Things de-
pendeth chiefly hereupon. And common Experience driveth
us to confess the Access and Recess of the Sun unto the four Car-
dinal Points of the Circle to be the most general and assured Cause
of the Years successive Alteration. Thus, at the Commence-
ment of the Winter Quarter, (for instance) which is always at
such Time that the Sun enters into the Tropick of *Capricorn*,
whereby he hath attained his greatest Declination *Southward*,
and is then farthest from our Zenith or Vertex, whence divers
Impediments evident in Nature do follow. Our septentrional
Parts are then bereaved of that Heat and Vigor, wherewith at
other Times the Sun being nearer our vertical Point, doth pre-
serve and cherish the Elements and all Things composed of them,
whether Vegetable or Sensative. For whereas, first of all, Con-
tinuance of Action doth necessarily add Force of Operation to
all natural Agents, it cometh to pass in Winter, by reason of
the Sun's remote Position, that his Continuance above the Ho-
rizon is shortest, and his Absence longest, causing thereby the
shortest Days and longest Nights. For example, the Elevation
of the Pole at *London* is $51^{\circ} 32'$ and the Sun's greatest Declina-
tion $23^{\circ} 29'$. Therefore in the Winter Solstice the Sun fi-
nishes his diurnal Ark, to them of this City, in 7 Hours and a-
bout 35 Munits, and therefore can heat the Air here but for
a little while, seeing his Stay above the Horizon is not one
third of the Time that he remaineth hid under the Earth, when
he imparts no benefit of his Light and Heat. Whereas in Sum-
mer the Sun's operative Virtue in this Latitude is 16 Hours 25
Minutes, not ceasing above 7 Hours 35 Minutes from Action
by his Absence under the Horizon. Wherefore what Propor-
tion 7 H. 35 Min. hath to 16 H. 25 Min. the like Difference
there is between the Sun's Operation in Summer and Winter,
in respect of his diverse Stay about the Horizon, which is a-
bove double Proportion one to the other.

II. **O**bservations upon the Influences of the Planets at the times of the Sun's Ingresses this present Year.

Of the Spring Q U A R T E R.

The Spring Quarter takes its Beginning this Year on *Tuesday* the 9th Day of *March*, at 32 Minutes after six in the Evening, when 7 Degrees of *Cancer* culminates, and 5 Degrees of *Libra* ascends. The Moon is in 25 Degrees of *Virgo* departing from the Opposition of *Mars*, and applying to the Opposition of the Sun, and the rest of the Planets disposed as in the preceding Scheme. A Spirit of Murmuring now prevails, and many remarkable Accidents are near Manifestation in the *East* and *South-East* Parts of *Europe*. Govern-

ments are distress'd, and old Matters made the Subject of new Disputes. Some Princes of the Empire, will have the Misfortune to fall under great Troubles by high Demands, hasty Results, and rash Attempts. Astonishment and Surprise seizeth an active Prince, or rather a crafty and active Nation in Europe, whose Projects succeed not according to their Expectation; they will find to their Cost, that other Nations are as wary and vigilant, as themselves are crafty and enterprising. In this Quarter, will many Projects be form'd, and the foundation laid of some considerable Event, which will be in part manifest before the End of the Year.

Of the Summer QUARTER.

This Quarter begins on *Thursday* the 10th Day of *June*, at 35 Minutes past 5 in the Evening, when 28 Degrees of *Scorpio* ascends, and 23 Deg. of *Virgo* culminates, the ☾ is in 11 Deg. of ♍ applying to the Opposition of ♀ and ♄, and to the Square of ♀. Positions the most Angry and Violent that some Years have produced! which do manifest the Designs and Actions of most Nations in Europe, (and perhaps in other Parts of the World also) to be Violent, Resolute and Martial, in order to bring former conceived Projects to a Conclusion, and to hasten the Fate of a certain Nation, about which this grand Hurry of Affairs is mostly engaged. The Proximity of ♀ and ♄ in the Sign ♍ at the time of this Ingress, as also of ♀ and ♀ in the Sign ♄ in quartile to the other two, will incline the Air to high and turbulent Winds, and to a harsh, dry and unhealthful Disposition: It signifies also many notorious and publick Villanies, libelling and abusing the Government by scandalous Invectives, endeavouring to poison the Minds of Men into Disloyalty and Disaffection to their Superiors. Many eminent and extraordinary Events and Alterations will shortly be made visible, and manifest themselves upon the Theatre of the World; yea, so superlative will the Actions of some Men be, that the Hearts of many will fail, for fear of the Things that are impending and hovering over them. The Shafts of Heaven fly *Southwards*; *Spain*, *Italy*, and some Parts of *Germany* are the Places principally pointed at, but not the only Places,

Coley, 1742.

Places, over which they will shed their Malignity; we may expect to hear from several other Parts of the World, of Wars and Rumours of Wars, Fightings, Bloodshed, Besieging of Cities and strong Towns; yea, also of Famine, Pestilences and Earthquakes; but see that you be not troubled saith our Blessed Saviour, for all these Things must come to pass, but the End is not yet: We in *England* shall not so sensibly feel the Effects of War and other Calamities, as some of our Neighbouring Nations will; and if God Almighty shew not his Anger upon us for our manifold Sins and Iniquities, we of the *British* Nation shall be Victorious over our Enemies, both by Sea and Land: Yet I do not say, that we shall be wholly exempt from Troubles, Animosities and scarcity of Provisions at Home, or from less Damages in our Trade and military Affairs abroad. The Accidents here spoken of are not yet come to their Maturity, for though this Revolution may produce many remarkable Accidents and Mutations in several Parts of the World, the grand Mutation or Fall of *Antichrist* is not yet, but the Time seems to be not far off; in *August* next is a Conjunction of *Saturn* and *Jupiter* in the fiery Trigon, and in that Part of it too which hath particular Signification of *Rome*, *Italy* and other Territories there about: Under the Dominion of such a Conjunction the Antients have observed the Erection of new Empires, Monarchies and Dominions. About the Nativity of our Blessed Saviour, the Congress or Meeting of these two ponderous Planets was celebrated in the fiery Trigon, at which time *Augustus Cæsar* obtained the chief Empire of the *World*, and settled all things in Peace and Tranquility. About 800 Years after, when the Conjunction of these Planets returned into the same Constellation and Trigon, *Carolus Magnus* erected a new Empire, and the worshipping of Images is condemn'd by a Council at *Constantinople*. The superior Planets now forming their several Conjunctions under the seventh Restitution of the fiery Triplicity, hath in the Opinion of some learned Men, a more secret Mystery of Sabbatism, and promises something of more singular Moment to the World. *Trigonus* *Υ. Ω. ♄. est Christianorum ejus Dominus Υ*, saith *Dagobertus*.

The fiery Trigon hath Relation to the *Christians*, as our Experience hath proved. And the famous *Alstedius* was of Opinion, that the Fire of this Conjunction (meaning the Restitution of this Trigon,) will consume the Dregs and Refuse of *Rome*, that is, by that time the Superiors have performed their Period of Conjunctions in this Triplicity, or sometime before the Year 1782. And without doubt, this very Conjunction we are now treating of, will have great Influence upon the Sea and Territories of *Rome*; perhaps not to a total Subversion as yet, but in very great Alterations preparatory thereto. As this Conjunction is in Trine to *England's* Ascendent it portends good to this Nation, and the Advancement of it's Honour and Glory.

The Heavens saith *Keckerman*, most effectually operates upon a Humane Body, best agreeable to itself; and so also on the Bodies both of Princes and their Subjects, so that it changeth their Temperaments and Conditions, and they being changed, a Mutation of the Commonwealth followeth. It is certain that God hath appointed fatal Bounds and Limits to all Empires, Kingdoms, and Commonwealths, and when any change thereof is eminent, it is no difficult Matter to read it in the Book of Nature, and chiefly in the Heavens or heavenly Bodies, the only Measure of all Times, and which are exposed to our View, as Signs of present and future Things. But besides these superiour Causes, there are also inferiour natural Causes, by which Persons who are not acquainted with the more Noble and Superiour, may in some Measure judge of any Mutation about to happen in the World; and in a Time of War, and amongst disturbed Nations, which it is that will probably suffer a Change; and they are such as these, *viz.*

1. Intemperance and too great Pride in Princes, and an immoderate Desire to advance their own Family, or some particular Persons to the Prejudice of Trade, and their People in general. Such a Conduct in Princes do often occasion Change in the Commonwealth.

2. The like when Princes are effeminate and cowardly, for like as Empires are obtained, maintained and kept by warlike Fortitude, so on the contrary are they lost, or dangerously changed by Softness and Pusillanimity.

§. The

Coley, 1742.

3. The Perjuries of Princes (that is, when they keep not their Oaths made to their Subjects, at the Time they were called to govern) bring upon the Kingdom, Changes and Revolutions

4. The Authority of a Prince decreasing produceth Change, and when the Periods of Empires are devolved, the Authority of those that govern faileth.

5. When Princes listen not to wise and faithful Counsellors Changes are eminent.

6. When publick Judgments are corrupted and heinous Impieties go unpunished, Changes are at Hand.

7. When the Prince affords not his Subjects a lawful and necessary Defence, but suffers them to be vexed by Incurfions of Enemies, Changes ensue.

8. When the Revenues of a Kingdom decrease, a Change must follow, for Money is the Nerves of Empire.

9. When the Prince doth too much oppress his Subjects with Taxes and Exactions, a Change succeedeth.

10. When the Power and Amplitude of Kingdoms arrive at an exceeding Greatness, or are too far extended, a Change followeth for the most Part, and the Empire falleth by its own Weight.

11. Foreigners rashly irritated, or called into a Kingdom, do introduce a Change thereof.

12. When greivous Wickedness is committed amongst the Subjects and all Reverence of the Laws shaken off, and that they live licenciously in Lust and Luxury. When Subjects degenerate from their pristine Fortitude, and become unwarlike and effeminate. When they begin to have their Princes in Derision and grow weary of them, Changes will assuredly follow.

13. Punishments and Changes do ever succeed the Infidelity, Disobedience and Contumacy of Subjects. Where neither the Laws nor Magistrates are had in Honour, there the Commonwealth cannot be safe or durable.

Of the Autumnal QUARTER.

The Autumn or Harvest Quarter begins when the Sun enters the Æquinoctial Sign ♌, which happeneth this Year on

Sunday

Coley, 1742.

Sunday the 12th Day of September, at 10 Minutes before 7 in the Morning. When 9 Degrees of the same Sign ♊ ascendeth the Horoscope and 12 Degrees of ♋ culminates, the Moon is in ♊ with ♊ in the 10th House, and applying to the $\ast$ of the ☉ and ☿ . Saturn ♄ and ♀ are all in the 11th House in the Beginning of the Sign ♎ , and the ☉ and ☿ in ♊ in the 12th. Thus are all the Planets posited above the Earth, and in the oriental Part of the Heavens.

Notwithstanding some Overtures for Peace seem to be made now or near this Time, and more in Agitation for a full Reconciliation of the present Differences in all or most Nations of Europe, more particularly between the gallant *English* and the heavy Haughty *Spaniard*, yet I fear a longer Continuance of impending Calamities, if not an Addition of at present inextricable Troubles, because of these dire Effects which usually attend such a ♊ of ♊ and ♄ as was celebrated the last Month, whose Effects will not be over for some Years yet to come. And I am further confirm'd in my Judgment of approaching Disturbances from the Application of the ♄ to the Body of ♊ in a cardinal Sign, and in one of the principal Angles of the Figure, which do naturally signify high and lofty Disputes, great Discord, Wars and Slaughters of Men, in which kind of Calamities the *Prussians* and *Hollanders* will have a considerable Share.

Of the Winter QUARTER.

This Quarter begins on *Friday December* the 10th, at 21 Minutes after 10 at Night, when 13 Degrees of ♎ riseth in our *Eastern* Angle, and ♄ posited therein, ♊ and ♊ being lately risen, and in ♊ in the 12th House, not far from the Degree ascending, 7 Degrees of ♋ culminates and ♀ Lord thereof in his Detriment in the 4th House, in $\square$ to ♄ the ♄ is in 4 Degrees of my departing from the $\ast$ of the ☉ and applying to the $\ast$ of ♊ and ♊ . These Positions and Aspects are most of them of a malevolent Nature, and shew that such Nations and Countries as are subject to their Influence, are under very uneasy and melancholy Circumstances. The ♄ of ♊ and ♊ in ♎ in $\square$ to ♀ their Depositer will much affect and afflict

Coley, 1742.

afflict several Parts of *France*, (particularly the City of *Paris*, with notable Accidents, and unexpected Commotions. It stir up Anger and Strife, denotes the dissolving of Friendships, Leagues and Covenants: It also corrupts the Air, and renders it unhealthful to all kinds of Animals.

III. Of the ECLIPSES.

THERE will be four Eclipses this Year, viz. Two of the Sun, and two of the Moon, and all of them invisable.

The first is of the Moon, on *Saturday* the 8th Day of *May*, at three in the Afternoon.

The second is of the Sun, on *Sunday* the 23d Day of *May*, at one in the Morning.

The third is of the Moon, on *Monday* the 1st Day of *November*, about Noon.

The fourth and last is of the Sun, on *Tuesday* the 16th Day of *November*, at six in the Morning.
